Thalia Woods

Available for freelance full-stack web and creative tech work

FULL-STACK WEB DEVELOPER

WORK EXPERIENCE

Web developer - DICOM, French Ministry of the Interior

Work-study · September 2026 - Present

- Migrate Drupal's **Twig** templates to a **Next** front end in **TypeScript**, across several of the Ministry's sites: elections, Vigi Rep, the institutional portal.
- Apply **RGAA** accessibility requirements to every migrated page: semantic structure, keyboard navigation, contrast and text alternatives, within the French State design system (**DSFR**), including two accessibility trainings taken in this context.

Full-stack developer - Détours en Cinécourt

Internship · March 2026 - May 2026

- Designed and developed an internal film management platform for a short film festival, used by a 40-person team to centralise the selection process.
- Led the product redesign: UX/UI conception (wireframes, user journeys) and development of the interface in **Next.js**, **React** and **Tailwind**, structured the data architecture and prepared the backend integration with **MongoDB**. Implemented key features, as well as access control and sensitive data management.

Creative developer (freelance) - Https:// (3D interactive experience)

Ongoing creation, Ateliers Médicis · February 2026 - June 2026 GitHub

- Collaborate with an artist to translate an artistic vision into an interactive system and develop a 3D interactive experience (exploratory video game) with **Godot**, combining spatialisation, sound design and immersive storytelling. The scenes integrate models derived from photogrammetry, reworked in **Blender** to clean up and remove parasitic elements.
- Design a modular object-oriented architecture (worlds, audio, events), manage the dynamic loading of scenes and synchronise the sound and visual interactions in real time via a **MIDI** controller.

Front-end developer - Julaya

B2B Fintech · January 2025 - February 2026

- Designed and deployed a headless CMS (**Strapi** + **Next.js**) connected to the landing page and the blog, enabling the marketing team to publish autonomously and reducing technical interventions on content.
- Structured the data schemas, integrated the **Figma** mockups and developed the fetch logic and front-end components for a complete production deployment.
- Evolved front-end features in **TypeScript** alongside the product and QA teams: handling edge cases, securing user journeys and reducing regressions.

TECH PROJECTS

Témoigner pour Lutter GitHub · Site

- Conception of a living archive web tool for the Ely & Marion Collective, built around the consultation of testimonies and media fragments (text / image / video).
- The Do It Yourself section allows users to compose a form live via a canvas, an audio console, PDF/video export and a dedicated space for exchanging user creations.
- Development in **Next.js**, object-oriented **TypeScript**, **Tailwind**, with **Bunny CDN** and **Bunny Stream** for media storage and streaming delivery, and a clear data structuring.

Hannah Hajar GitHub · Site

- Design and develop an experimental 3D site for a musical duo: content (images, videos, texts, dates) floats around a sphere explored by orbiting, with no menu and no scrolling.
- Distribute the content along the golden angle (Fibonacci layout) in **React Three Fiber** and **Three.js**, animate transitions with **GSAP**, serve heavy media through **Bunny CDN**, and write the **GLSL** shaders for the background: fractal noise folded onto itself that reacts to the cursor and never repeats.

EDUCATION

Gobelins Paris 2026 - 2028
Master - Lead Tech
Expert en création numérique interactive

Ada Tech School 2023 - 2026
RNCP Level VI - Bachelor's equivalent
Application Designer & Developer

Aix-Marseille University 2020 - 2021
DAEU A - With Highest Honours
(University entrance diploma)

SKILLS

Front
Next.js · React · TypeScript · Tailwind · Angular · HTML · CSS · iOS (SwiftUI)

Back
Node.js · Express · Strapi · Python · PHP

Data
PostgreSQL · MongoDB · MySQL

Creative coding
Godot · Three.js · Canvas 2D · GLSL · MIDI · Web Audio API

Creative
Blender · Illustrator · Photoshop
Premiere Pro · After Effects

Tools
Docker · Git · CI/CD · Jest · Playwright · Prisma · Latex · Figma

LANGUAGES

English · native C2
French · bilingual C2
Spanish · conversational B2

VOLUNTEERING

Les Papillons Blancs de Paris
Computing workshops for people with intellectual disabilities

Vision Festival - Aix-en-Provence
Mentoring children through filmmaking

Mathematics Club - Marseille

La Maraude Sans Nom - Marseille
Outreach and aid for undocumented people

French Red Cross - Paris
Outreach patrols and food collection

Shotgun Public Relations - Paris
Public relations for events

INTERESTS

Illustration (ink / watercolour)
Upcycling
Piano
Tattoo artist (beginner)
Writing (flash fiction, poetry)
Arthouse cinema
